

DISPOSABLE DOUBLE RESTRAINTS WITH PULL LOOPS

INTRODUCING "4ZERO"

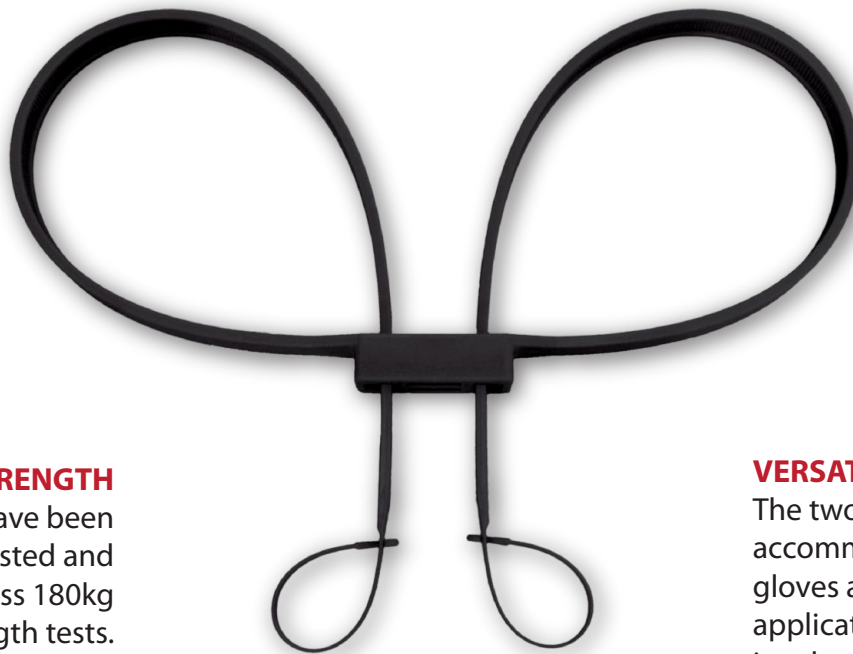

4ZERO

HIGH PERFORMANCE RESTRAINTS

**THE WORLD'S FASTEST &
STRONGEST DISPOSABLE
POLYMER RESTRAINT**

INTRODUCING "4ZERO CUFFS" - THE WORLD'S FASTEST & STRONGEST DISPOSABLE POLYMER RESTRAINT

DESIGN

Our patent pending four loop design is the most innovative design to ever come to personal restraints.

QUALITY

4ZERO CUFFS are manufactured in the USA under ISO 9000 certification, confirming strong commitment to quality and reliability.

STRENGTH

The 4ZERO CUFFS have been vigorously tested and consistently pass 180kg tensile strength tests.

VERSATILITY

The two smaller loops accommodate fingers with gloves and allow fast application of the restraint even in adverse weather conditions.

SAFETY

Wide, smooth strap reduces risk of injury and gives greater control during subject cuffing. 4ZERO CUFFS reduce user liability and are safer for the prisoner.

Part #	Description	Units / Pkg	Tensile Strength	Colour
4ZCUFFBK	4ZERO CUFF	100	180kg	Black
4ZCUFFNA	4ZERO CUFF	100	180kg	White
4ZCUFFRD	4ZERO TRAINING CUFF	100	180kg	Red
4ZCLIP01	Belt Clip (holds 5-8 CUFFS)	1	NA	Black

- Stop valuable metal handcuffs from going missing by using low cost disposable plastic cuffs.
- Wide, smooth strap reduces risk of injury and gives greater control during subject cuffing.
- Strongest disposable restraint on the market with a tensile strength of over 180kg.
- Remains supple in dry climates due to being made from a high performance polymer (most other nylon styles are made of nylon 66 and can become brittle quite quickly).
- Can be used for both wrists and ankles.
- Compact size for easy carriage and storage.
- Disposable, therefore more hygienic and less hassle than metal cuffs.
- Compatible with standard handcuffing techniques.
- Finger Loops allow a one handed single pull action. This frees up the users other hand, which is safer.
- Manufactured under ISO 9000 certification. Withstands up to 200°C temperature.
- Red TRAINING CUFFS are reusable - they can be removed without cutting.
